MAKE YOUR OWN ZAP WITH TRIGGERS + ACTIONS

31

Triggers

New Event Matching Search

Triggers when an event is created that matches a search.

Event Start

Triggers a specified time before an event starts.

New or Updated Event

Triggers when an event is created or updated (except when it's cancelled).

New Event

Triggers when an event is created.

New Calendar

Triggers when a calendar is created.

31

Searches

Find Event

Finds an event in your calendar.

Optionally, create one if none are found.

31

Actions

Delete Event

Deletes an event.

Create Detailed Event

Create an event by defining each field.

Quick Add Event

Create an event from a piece of text. Google parses the text for date, time, and description info.

Get Help

Update Event

Updates an event. Only filled fields are updated.

What are Triggers, Searches, & Actions?

Triggers, Searches and Actions are the building blocks that power your integrations. Triggers Watch for events in your apps, then kick off a sequence of Searches and Actions. Searches look up existing data, and Actions create new items. These combos—called "Zaps"—complete your tasks automatically.

Build a Zap with Google Calendar Now

TIP Multi-Step Zaps

Try using one Trigger to send multiple Searches and Actions into motion. Step Zaps help your apps work in harmony.

WHAT IS ZAPIER?

You use lots of apps to get your work done. Zapier lets you easily connect those apps together to help automate tedious tasks.

Join the thousands of businesses and individuals already taking advantage of the power of automation and let Zapier save you time.

Start FREE Today!

What's a Zap?

A Zap is a connection between two apps made of a trigger and an action. Whenever the trigger event happens, Zapier will automatically make the action event happen for you!
